NEWLY-INVENTED

MAGNETIC-ELECTRIC MACHINE.

A SPLENDID CURE FOR RHEUMATISM, &c., AND NERVOUS AND OTHER DISEASES.

DIRECTIONS FOR USE.—Connect the two Metallic cords or wires with the sockets in the ends of the box, and apply the handles connected with the other ends of the cord or wires to any part of the person through which it is desirable to pass the current of Electricity. Then turn the crank, regulating the strength of the current by the speed, and by the knob at the end of the box; it being desirable to increase the power only to that degree most agreeable to the patient. It is less unpleasant to the patient if a wet sponge is placed in the end of each handle, and these applied to the skin; as this method will prevent the prickling sensation. The sponges should never be put inside the box while wet. In applying it for the Tooth-ache, &c., the operator takes one handle and places his fingers or sponge over the part affected while the patient holds the other handle. In applying it to the foot, place one of the handles in the water with the foot, and hold the other in hand; or apply it to any other part of the person.

NOTE.—The bearings and springs must be oiled occasionally. If the Machine gets out of order bring it to the maker.

Manufactured by A. FRANKS, Electrician,

95 & 97, DEANSGATE, MANCHESTER.
44, MARKET STREET, MANCHESTER.

143, LORD STREET, SOUTHPORT,
60, WHITEFRIARGATE, HULL.
